

Canoe Asset Data

Canoe Asset Data

Canoe Asset Data builds on Canoe's track-record of alts data accuracy, completion, and timeliness by empowering investors with more transparency and precision at the asset-level.

By extracting, standardizing, and delivering asset-level data sourced directly from their GPs, investors can make operational and investment decisions with more clarity and confidence.

With more transparency at the asset level, you can:

MANAGE YOUR PORTFOLIO MORE HOLISTICALLY

Obtain the missing link in your portfolio exposure and risk analysis with comprehensive summaries for each asset-level investment across all your private investment funds.

ACHIEVE OPERATIONAL EXCELLENCE

Access static and transactional attributes for a nuanced understanding of operational metrics, ensuring operational excellence and process stability.

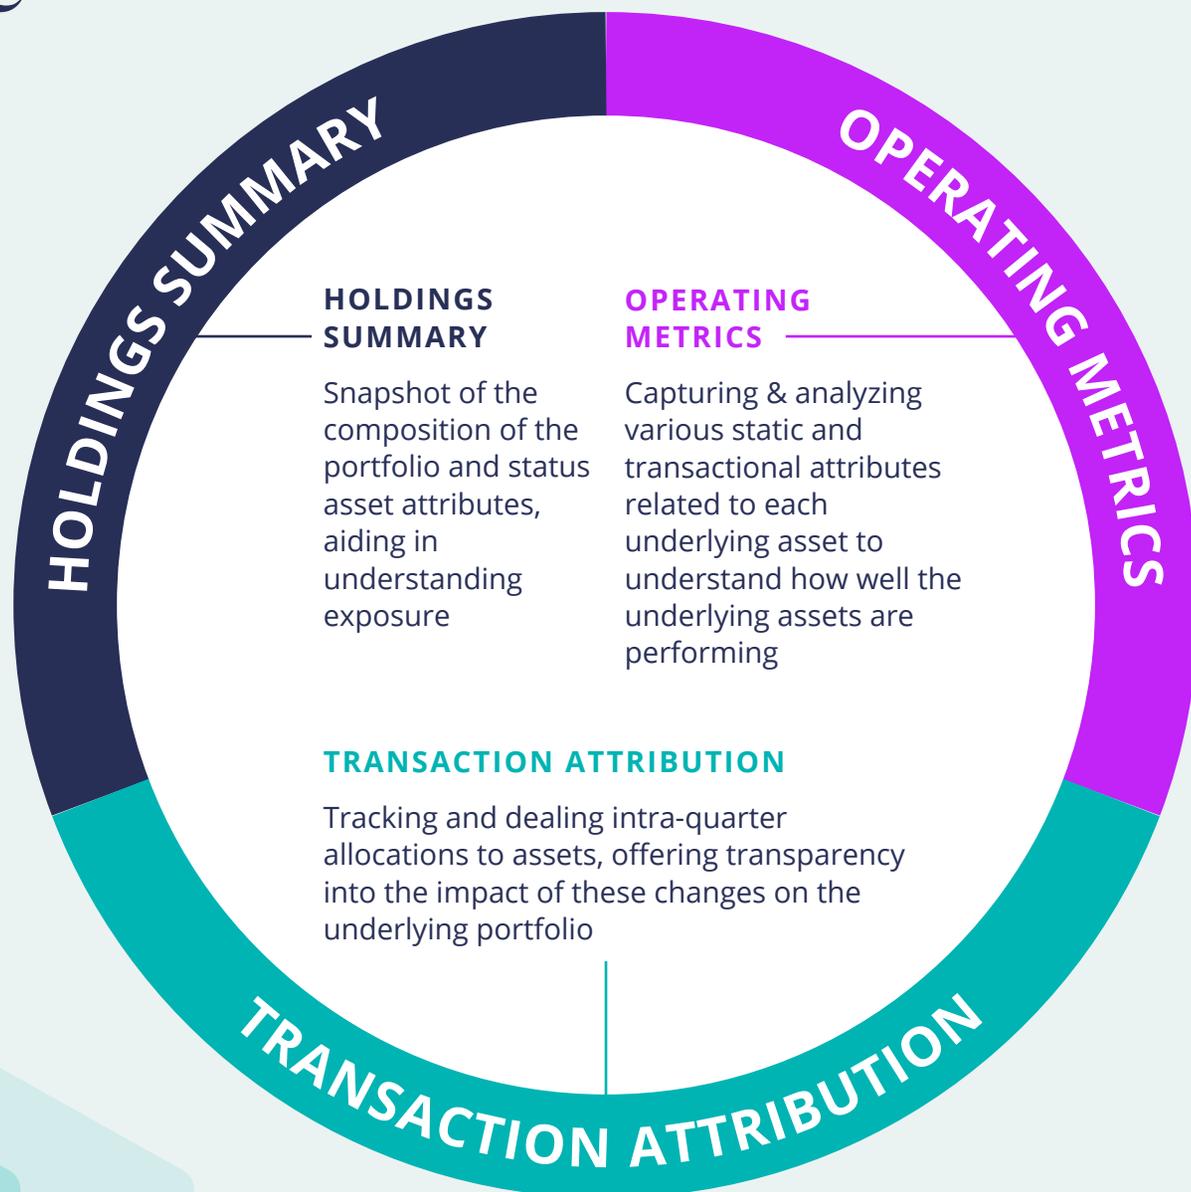

OPTIMIZE YOUR INVESTMENT STRATEGY

Navigate investment-specific allocations at the asset level with clarity and precision, optimizing investment strategies and decisions for improved returns.

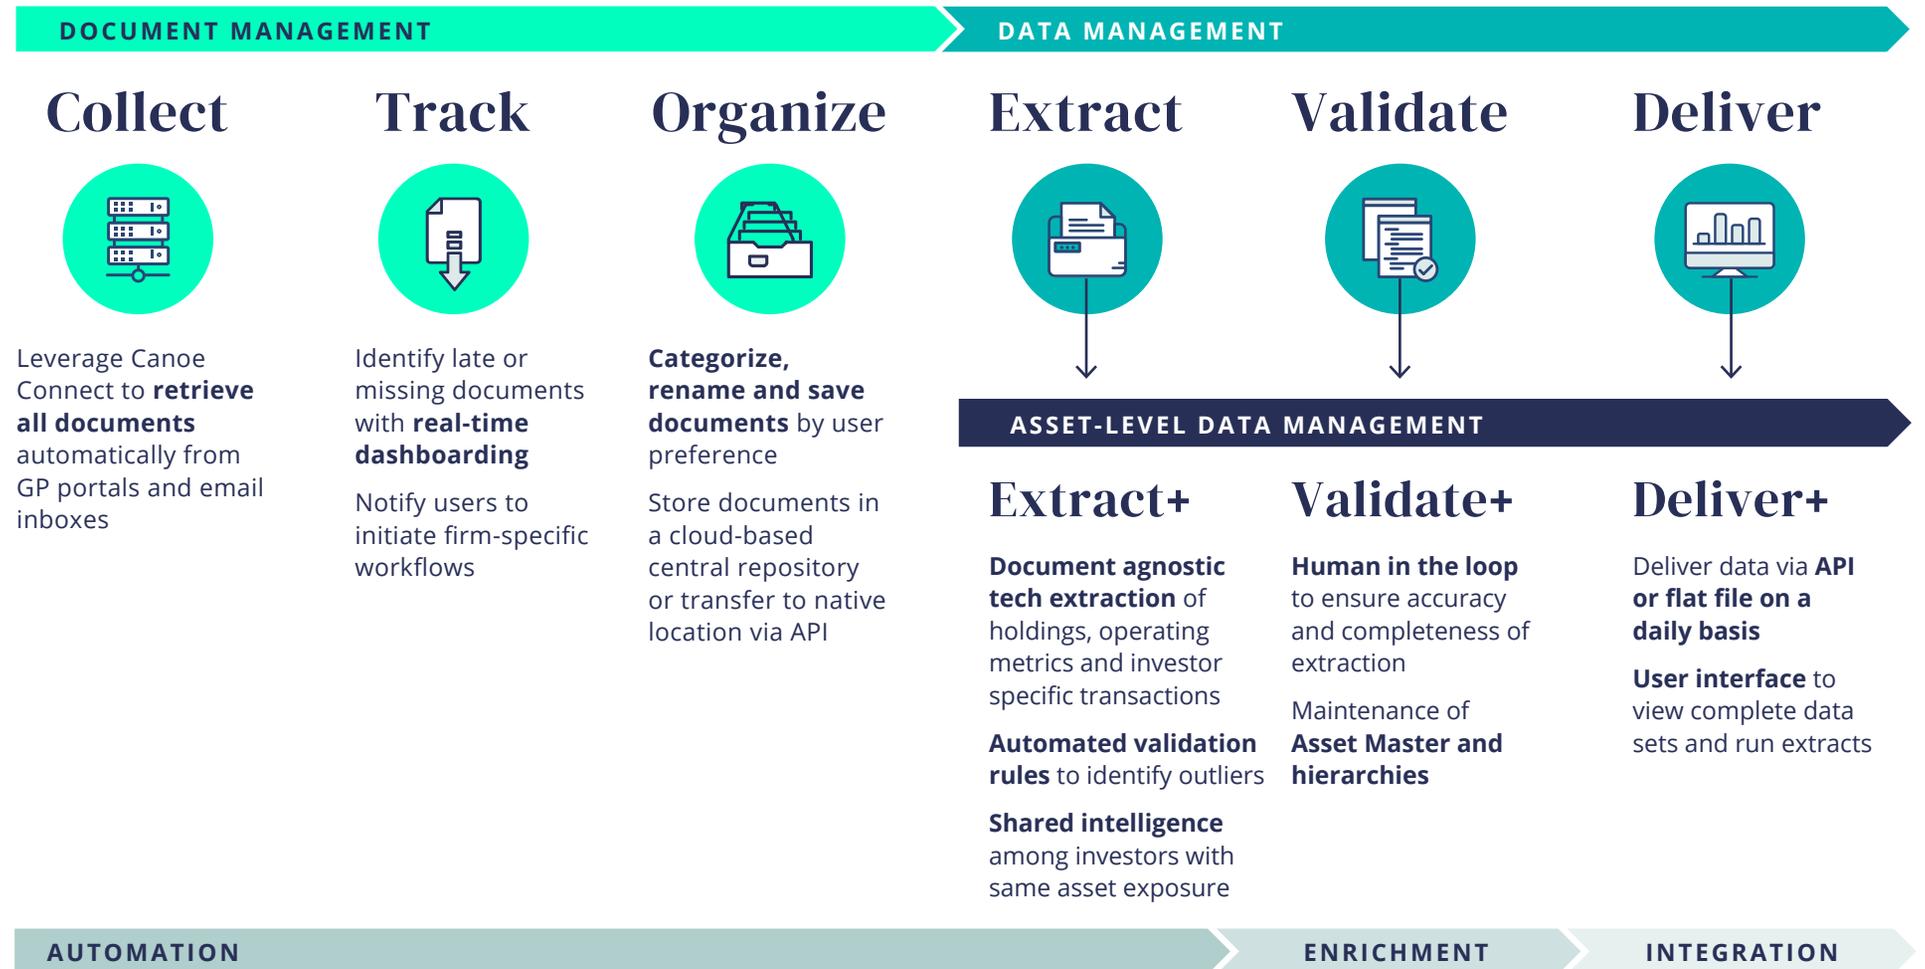

Comprehensive data sourcing

Harnessing disclosed data from General Partners, **Canoe meticulously extracts crucial asset-level information** and delivers it to you within 5 days after document receipt. The Canoe Asset Data offering includes three components:

How does Canoe Asset Data work?

Canoe Asset Data delves deeper into the underlying holdings of alternative investments, leveraging the same robust document collection, tracking, and organization process that has fueled the industry adoption of Canoe Intelligence.

Defining asset data excellence

Canoe is guiding the alts industry upward and onward with its automated workflows for documents and data management, comprehensive support for firm and user types, and best-in-class data accuracy, completeness and timeliness.

DOCUMENT AGNOSTIC

Flexible data extraction from diverse document types.

STREAMLINED PROCESS OVERSIGHT

Transparent management of document processing progress from start to finish.

WHITE GLOVE EXPERIENCE

Personalized, precise data validation service.

ASSET MATCHING AND RESOLUTION

Ensure accuracy in entity tracking, naming, & data resolution.

SHARED INTELLIGENCE

Data efficiency through collective insights from extensive fund coverage.

TIMELY SLAs

Swift delivery with industry-leading service level agreements.

ADVANCED DATA ANALYSIS

Accurate computation and data enrichment for precise alts insights.

INTEGRATIONS

Seamless connectivity into existing systems for enhanced functionality.

Explore what you can do with more transparency at the asset-level with Canoe.
